Your new source for all whatâ€™s cool in the entertainment world.Q: Apex Variant Callouts I need to call a 3rd party API and pass in dynamic variables that need to be accessed in apex. However, I am getting an error when calling the API. I've narrowed down the issue to the line after the apex : @RemoteAction global static String executeQuery(String query, String qid) There is an error because the variable query isn't defined. This code works perfectly in my VF page: ` f30f4ceada
